	<p>Heatcraft Refrigeration Products is the long-standing leader in the world of commercial refrigeration, providing climate-control solutions to customers in more than 70 countries. We have long been known for combining innovative technologies with precision engineering to design refrigeration systems capable of meeting the demands of the most rigorous operating environments. Our state-of-the-art manufacturing facilities produce evaporators, condensers, merchandise display cases and other top-quality refrigeration products for our market-leading brands: Bohn, Larkin, Climate Control and Chandler. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>A global leader in the industry for over 80 years, Frascold produces over 70,000 screw and reciprocating compressors a year. Our 463,000 square foot factory outside of Milan, Italy houses our advanced engineering, manufacturing and testing facilities. Frascold carries a complete line of semi hermetic and open drive reciprocating compressors as well as semi-hermetic and open drive screw compressors - all with a standard two-year warranty. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>Standard Refrigeration was founded in 1922 - long before words like innovative and entrepreneurial were fashionable. Throughout it's long history, the company has acquired a solid reputation for refrigerant heat exchangers that are not only innovative, but designed and manufactured to the highest standards of performance and quality. Today Standard has grown to be the world leader in heat exchangers and pressure vessels for the commercial and industrial market. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>Warren Technology has provided electric heating equipment for more than 50 years. Warren offers custom duct and standard unitary slip-in heaters to meet electric heating specification and design requirements. Incorporated in 1957 as a manufacturer of electric heaters, Warren Technology has assumed a leading role within the HVAC industry, designing, developing, and manufacturing a broad spectrum of precision heating, ventilation, and air-conditioning products. Texas, Louisiana, Oklahoma, Florida & Arkansas</p>
	<p>SGS Refrigeration, Inc. manufactures and supplies industrial refrigeration equipment. Their propduct offering includes evaporators and evaporative condensers for various industrial refrigeration applications. SGS Refrigeration is a supplier of high quality equipment. With more than 80 years combined experience they have a clear focus on Service to the Customer. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>J&M Fluidics offers quality process fluid chillers built in the U.S. by Americans that are designed, manufactured, and delivered by quality people. The J&M Fluidics mission is to provide innovative, high-quality process chillers, tank and pump skids, custom fluid cooling solutions and economizer products to the U.S. and international markets at competitive prices. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>Specializing in industrial refrigeration, M&M offers a variety of equipment and packaging options. M&M has designed and manufactured refrigeration systems for over 40 years. We custom design every system to maximize our customer's refrigeration performance and efficiency. Collectively, our engineering staff has over 175 years of experience. Our facilities include a 136,000-square-foot manufacturing facility in Maryland, a 10,000-square-foot controls manufacturing facility in Florida, and a 7,000-square-foot service support center in Alabama. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>For over sixty-five years, Paul Mueller Company has earned distinction for delivering outstanding equipment and unique solutions to the refrigeration and process industries. Mueller offers falling film chillers, air-cooled chillers and heat transfer products. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>Vapor Armour's revolutionary vapor barrier system creates an impermeable barrier between warm, cold, and frozen storage spaces. To seal the gap between the roof and wall, PVC membrane is set in adhesive, creating an enclosed envelope and preventing vapor drive between storage areas. Texas, Louisiana, Oklahoma & Arkansas</p>
	<p>As a custom manufacturer, we pride ourselves on providing the exact size walk-in to fit your needs at a very competitive price while staying in compliance with the Energy Independence Security Act (EISA). EISA sets energy requirements for commercial walk-in coolers and freezers. In 2017, the family-owned company was purchased by Imperial Brown, one of the leading manufacturers of walk-in coolers and freezers in the world. The purchase gave Imperial Brown manufacturing operations on both U.S. coasts, as well as in the Heartland, ensuring efficiency and savings for customers. Louisiana, Oklahoma, & Arkansas</p>
