

RELIANT SALES, LLC

Specializing in Engineered Solutions

Representing these manufacturers of high-quality equipment in Texas, Oklahoma, Arkansas, and Louisiana

Heat Transfer Products Group (HTPG) designs, manufactures, and markets energy-efficient commercial and industrial refrigeration equipment and system solutions sold under the trusted premium brands: Russell, Witt, Kramer and ColdZone. From energy-efficient unit coolers and condensing units to air handlers and packaged systems, HTPG is poised to meet the demands of the food service, food retail warehouse, industrial and pharmaceutical industries and many more.

Established in 1961, Zero Zone is a leading manufacturer of refrigerated display cases and commercial refrigeration systems for supermarkets, drug, dollar, and convenience stores. With display case plants in North Prairie and Waukesha, WI and a refrigeration systems plant in Ramsey, MN, Zero Zone also manufactures industrial refrigeration systems for cold storage, food processing, and ice arenas.

As a custom manufacturer, Artic Temp prides themselves on providing the exact size walk-in to fit your needs at a very competitive price while staying in compliance with the Energy Independence Security Act (EISA). EISA sets energy requirements for commercial walk-in coolers and freezers.

In 2017, the family-owned company was purchased by Imperial-Brown, one of the leading manufacturers of walk-in coolers and freezers in the world. The purchase gave Imperial-Brown manufacturing operations on both U.S. coasts, as well as in the Heartland, ensuring efficiency and savings for customers.

A-1 Compressor, an ISO-9001 registered firm, remanufactures Copeland, Carrier, Trane and York Semi-Hermetic air conditioning and refrigeration compressors. Over 80 years of experience translates into superior quality and the best customer support in the industry. With over 600 compressor models and supporting spare parts in stock for immediate delivery, A-1 Compressor has "What You Need - When You Need it".

Standard Refrigeration was founded in 1922 - long before words like innovative and entrepreneurial were fashionable. Throughout its' long history, the company has acquired a solid reputation for refrigerant heat exchangers that are not only innovative but designed and manufactured to the highest standards of performance and quality. Today Standard has grown to be the world leader in heat exchangers and pressure vessels for the commercial and industrial market.

Warren Technology has provided electric heating equipment for more than 50 years and offers custom duct and standard unitary slip-in heaters to meet electric heating specification and design requirements. Incorporated in 1957 as a manufacturer of electric heaters, Warren Technology has assumed a leading role within the HVAC industry designing, developing, and manufacturing a broad spectrum of precision heating, ventilation, and air-conditioning products.

Aeroflex USA's EPDM insulation is engineered to be used extensively in conditioning systems for coolness loss reduction, condensation prevention, and energy efficiency. These high-quality products are designed to outlast the competitors and are proven by certifications from world's leading standards such as ASTM, UL, FDA, CDPH, etc. Aeroflex's product quality draws from EPG's world-class rubber R&D center and almost 50 years of experience developing and testing EPDM rubber products. All their foam rubber insulation products are American made at their world class manufacturing facility in Sweetwater, TN.

J&M Fluidics offers quality process fluid chillers built in the U.S. by Americans that are designed, manufactured, and delivered by quality people. The J&M Fluidics mission is to provide innovative, high-quality process chillers, tank and pump skids, custom fluid cooling solutions and economizer products to the U.S. and international markets at competitive prices

Sigma Engineering, LLC has been serving the HVAC/R industry since 2009 with specialty products that primarily serve the maintenance needs of the refrigeration technician. In 2017, Sigma took over the aftermarket requirements for the Standard Refrigeration products worldwide. These products included liquid level indicators, chiller barrel, condenser gaskets, zincs, and Rotolock service valves and adapters. Sigma stocks the products they sell allowing them to boast of a same day shipping rate of 99.8%!

For over sixty-five years, Paul Mueller Company has earned distinction for delivering outstanding equipment and unique solutions to the refrigeration and process industries. Mueller offers falling film chillers, air-cooled chillers, and heat transfer products.

R-Plus Cold Storage Doors' more than 40 years' experience and reputation for excellent customer service makes them the leader in cold storage doors. With Service Representatives throughout the U.S., R-Plus has the capability to provide new cold storage doors anywhere, complete with custom sizes and applications, or service your existing cold storage door needs.

R-Plus Doors appear everywhere: walk-in cooler and freezers, cold storage warehouses, foodservice kitchens, distribution center docks and receiving, ultra-low temperature freezers, glass display cases, environmental chambers, meat processing plants in USDA white finish. You name it, they are there.

SPX Cooling Technologies, Inc. is a leading global manufacturer of cooling towers, evaporative fluid coolers, evaporative condensers and air-cooled heat exchangers. For nearly a century, they have provided exceptional quality equipment and service to the HVAC, process cooling, industrial and refrigeration markets
